Manual Swing Door

Manual Double Swing Door

Manual Swing Door

Features :

- The door panel is filled with high-quality extruded plate, the middle layer is plywood, the aluminum alloy is used as the frame around to strengthen the hardness. The surface material is galvanized steel plate which is coated with PVC film or steel plate spraying, with enough bending strength, and the stainless steel body is wrapped.
- Door frame and decorative edge are all made of 1.2mm-thick 304 brushed stainless steel.
- Stainless steel and aluminum alloy material optional (beautiful, internal use, easy to clean, rust free).
- The sealing device at the bottom of the door is sealed by automatic up and down way.
